## BIO-MECH® II IRONS . . . oversized heads for high-tech performance!

Oversized Bio-Mech II irons combine several innovative, high-tech features that will benefit all golfers. A gradually thickened top line towards the toe, combined with peripheral weighting and a short hosel, make it very forgiving for golfers who tend to hit off the toe. The unique Three-Wedge System consists of a Pitching Wedge (#10), a Fairway Wedge (#11) and a Sand Wedge (#12). The in-between Fairway Wedge is great for those dreaded distances that fall between the capabilities of a strong 46° Pitching Wedge and a more lofted 58° Sand Wedge. Other features include:

- Longer than standard face with square grooves
- Progressive offset hosel
- Satin finished 4-31 stainless steel
- Coned hosel with a .370 bore
- O-ring recommended for assembly
- Available right-hand only in 3-9, PW (#10), FW (#11), SW (#12)

All of our heads can be ordered as Custom Assembled Clubs. Please see page 7 of The Buyer's Guide.

The top line widens from heel to toe allowing more weight distribution to correct off-center toe shots.

Contoured sole lessens drag at impact.

## BIO-MECH® II METAL WOODS . . . they have it all!

The Bio-Mech II® metal wood is one of the largest you will find. The super short hosel positions weight directly behind the face and the aerodynamic dual tunnel sole is designed to maximize head speed. With its 9.5° loft, longer drives are easily produced and the sharp appearance of the clear coted, vibratory finished head will give a golfer the confidence boost to really go for that long drive!

- 1½" face height
- Available right-hand only in 1, 3, 5, 7
- 17-4 stainless steel
- O-ring recommended for assembly
- Coned hosel with a .335 bore

## THE FAIRWAY DEVIL - **NEW!**

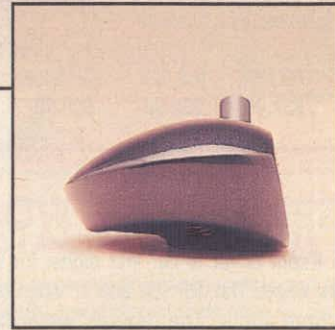

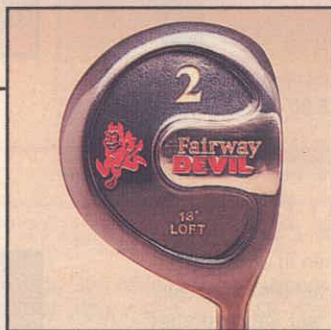

### A versatile 2 wood for driving or fairway shots!

Having a devil of a time driving off the tee – or managing those long fairway shots? Help is on the way with our new Fairway Devil! Its 13° loft virtually guarantees easier airborne shots. The recommended ½" decrease in shaft length (42½" for steel or 43½" for graphite) from standard on an oversized head allows better control for greater accuracy. Fairway Devil has a recessed sole with an island of stainless steel behind the sweet spot that provides a low center of gravity for a higher trajectory. Handsome Dark Gunmetal finish with red and gold paintfill.

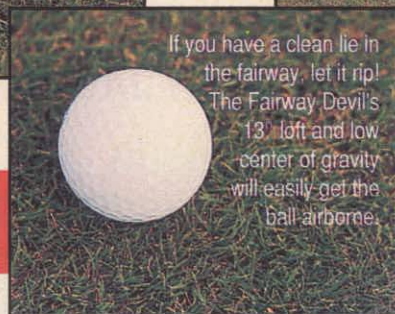

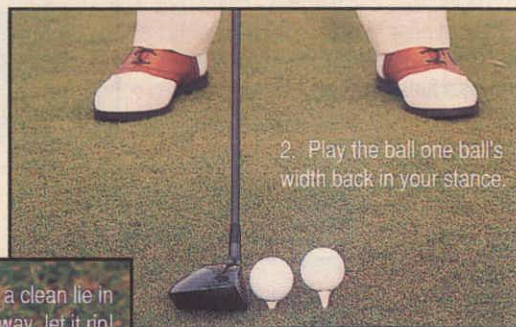

- 13° loft
- 56° lie
- .335 hosel bore
- 17-4 stainless steel
- Hosel coned for graphite shafts
- Hosel requires a ferrule
- 1° open face angle
- 202 grams

Code: **FDW**
